Semester I

- Introduction to Engineering Skill
- Engineering Mechanics (Statics)
- Technical Drawing
- Applied Mathematics I
- Sophomore English
- Introduction to Logic

Semester II

- Fundamental of Electrical Engineering
- Electrical Engineering Lab I
- Technical Report Writing
- Civic and Ethical Education
- Introduction to Economics
- Engineering Mechanics (Dynamics)
- Applied Mathematics II

Semester III

- Applied Modern Physics
- Applied Electronics I
- Electrical Workshop Practice I
- Electrical Engineering Lab II
- Introduction to Computing
- Applied Mathematics III
- Engineering Thermodynamics

Semester IV

- Computational Methods
- Applied Electronics II
- Electrical Workshop Practice II
- Electrical Engineering Lab III
- Signals and Systems Analysis
- Electromagnetic Fields

Semester V

- Probability & Random Processes
- Digital Logic Design
- Introduction to Electrical Machines
- Electronic measurement and instrumentation
- Electrical Engineering Lab IV
- Network Analysis & Synthesis

Semester VI

- Computer Architecture & Organization
- Object Oriented Programming
- Introduction to Control Engineering
- Electrical Engineering Lab V
- Introduction to Communication Systems
- Digital Signal Processing

Electronic Communication Focus Semesters

Semester VII

- Research Methods and Presentation
- Communication Systems
- EM Waves and Guide Structures
- Microcomputers & Interfacing
- Data Comm. & Computer Networks
- Microelectronic Devices & Circuits

Semester VIII

- Satellite communication systems
- Telecommunication Networks
- Antennas and Radio Wave Propagation
- Microwave Devices and Systems
- Semester Project
- Optics and Optical Communication
- Quality Management

Semester IX

- 6-Month Industry Internship

Semester X

- B.Sc. Thesis
- Wireless & Mobile Communication
- Switching and Intelligent Networks
- Industrial Management & Eng'g MEng-5910 Entrepreneurship for engineers

Electrical Power Focus Semesters

Semester VII

- Power Electronics
- Research Methods and Presentation
- Power Systems I
- Applied Energy Conversion
- Electrical Machines
- Modern Control Systems

Semester VIII

- Electrical Installation
- Electrical drives
- Power Systems II
- Renewable energy and rural electrification
- Semester Project
- Power System Planning & Operation
- Quality Management

Semester IX

- 6-Month Industry Internship

Semester X

- B.Sc. Thesis
- Power System Protection & Control
- Computer Applications in Power
- Industrial Management & Eng'g Economy
- Entrepreneurship for engineers

Computer Engineering Focus Semesters

Semester VII

- Research Methods and Presentation
- Microcomputers & Interfacing
- Data Comm. & Computer
- Data Structures
- Database Systems
- VLSI Design

Semester VIII

- Advanced computer networking
- Algorithm Analysis & Design
- Software Engineering
- Programming Languages Semester
- Operating Systems
- Quality Management

Semester IX

- 6-Month Industry Internship

Semester X

- B.Sc. Thesis
- Embedded Systems
- Intro. to Robotics & Industrial Automation
- Industrial Management & Eng'g Economy
- Entrepreneurship for engineers

Industrial Control and instrumentation focus

Semester VII

- Instrumentation engineering
- Research Methods and Presentation
- Power Systems I
- Electrical Machines
- Microcomputers and Interfacing
- Modern Control Systems

Semester VIII

- Electrical Installation
- Power Electronics & Electric Drives
- Computer based data acquisition system
- Process Control Fundamentals
- Digital Control Systems
- Semester Project
- Quality Management

Semester IX

- 6-Month Industry Internship

Semester X

- Embedded Systems
- B.Sc. Thesis
- Introd. to Robotics & Indust. Automation
- Industrial Management & Eng'g Economy
- Entrepreneurship for engineers
